

For your automation solutions

# Collaborative Automation Partner Program

The fastest way to wireless  
products and solutions  
for Schneider Electric devices

# connectBlue

connectBlue offers a complete range of wireless products and solutions focused on industrial communications. Our customers have benefited from using our OEM-Modules and Products for ModBus ASCII, ModBus RTU, Unitelway and ModBus TCP/IP in order to achieve wireless industrial communications.

The connectBlue OEM modules are specified for industrial use and fully radio tested and type approved, making the design-in process very quick and easy.

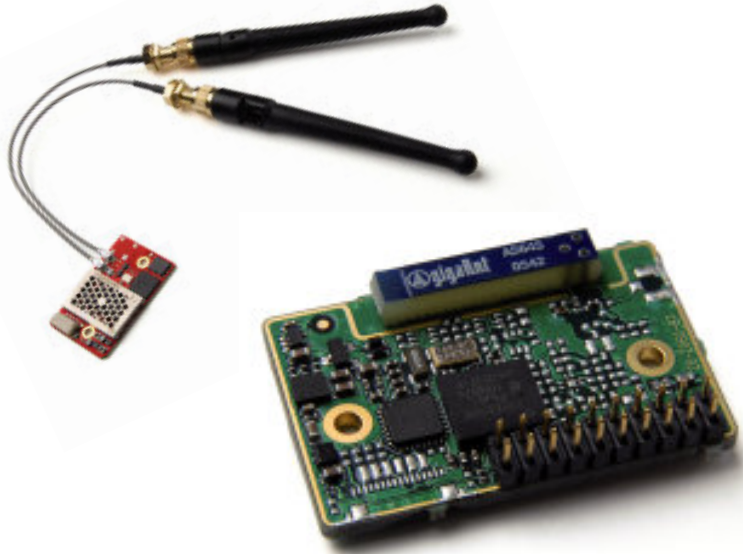

## The complete solution – products, engineering and services

Any device can be enabled with WLAN and Bluetooth technologies using products from connectBlue. You can choose to develop and install your own solutions using the industrial products, OEM products and advanced development platform for efficient implementation, or you can benefit from our complete range of engineering services. When there are special requirements for factors such as size or power consumption, connectBlue's extensive experience and expertise helps to realize the optimal combination of hardware and software to create the most cost efficient product.

## Complete Product Range

The connectBlue product offer covers a wide range of needs and are based on different radio technologies. The portfolio includes everything from small form factor modules up to modules that include a host processor for advanced scenarios. Independent of the radio technology selected, you will find hardware and software compatible modules that make it possible to change technologies without changing your product design. This benefit also applies to forward/ backward compatibility over time and different product generations.

## Bluetooth Products

A variety of certified ready-to-use products are available, including starter kits for evaluation, OEM modules for built-in purposes, as well as complete packaged products with their own housing. The functionality covers serial port adapters, repeaters, and access points as well as Bluetooth I/O-modules.

## WLAN Products

Certified ready-to-use products include modules supporting both 802.11b and 802.11b/g standards. Available are both OEM modules with all software embedded and modules that use a host processor for the TCP/IP stack

# Industrial wireless OEM modules - the fastest way to wireless products and solutions

connectBlue : whether you choose WLAN or Bluetooth solutions,  
our modules are known for their:

- > Outstanding compatibility over time and over technologies.
- > Optimized performance in range, in latency and in throughput.

## More service with Schneider Electric's worldwide coverage

### > Permanent worldwide availability

With over 5000 sales outlets in 130 countries,  
wherever you are you can be sure of finding  
a full range of products to meet your needs  
and fully compliant with the standards in your  
country.

### > Technical support

Wherever you are Schneider Electric provides  
technical support around the world.  
What's more, Schneider's experts are at hand to  
work out a customized solution with you.

## connectBlue

### The fastest way to go wireless!

connectBlue is a leading provider of wireless  
solutions for demanding applications in  
segments like industrial automation, medical,  
instrumentation, diagnostics, logistics /  
transportation, vehicles and point of sales.

Based on Bluetooth® technology, WLAN and  
802.15.4, connectBlue provides ready-to-use  
products and modules as well as custom  
designed solutions in both hardware and  
software. connectBlue AB is based in Malmö,  
Sweden and was founded in 2000
